

PROJECT ENGINEER

A key player helping ensure the success of major projects

At VINCI Energies, you work within a team in charge of major or multi-disciplinary projects, in which you have overall responsibility for part of the project during the bidding and execution phase. You take part in contract, financial and scheduling management for the works package for which you have responsibility and ensure compliance with the technical requirements. You submit proposals to help ensure the project's overall success.

YOUR RESPONSIBILITIES

- Take part in putting together competitive bids and ensuring optimum execution in compliance with the project timeline
- Develop relations with clients and stakeholders
- Manage teams and technical resources to coordinate the various project interfaces, particularly with respect to engineering
- Contribute to ensuring compliance with health, safety, quality and environmental rules
- Ensure the economic performance of your projects and thus help ensure that of the Business Unit

YOUR PROFILE

Engineering studies

YOUR SKILLS

- Sales ability
- Managerial skills
- Team spirit
- Entrepreneurship
- Discipline and organisation
- Interest in technical issues and innovation

As a Project Engineer, my role is to ensure that the contract is smoothly executed on time and in accordance with the technical requirements and financial objectives. I also have to keep an eye on quality and make sure that the safety and environmental requirements are met. My job is different every day, and that is what I like about it.

One day, I may be overseeing equipment production and performing acceptance procedures at the premises of a supplier and the next day I may be on the worksite to monitor execution. My job takes team spirit and people skills, because I am often in touch with the clients, suppliers and of course my own team.

I don't handle my projects alone. I work mainly with a Technical Manager, a Project Purchasing Agent and a worksite team. I find it very rewarding to be the interface on projects because it enables me to cover a wide variety of fields. ”
